No.	Question	Answer
<b>Questions dated: 26/02/2016.</b>		
3.	Electrical installations – Distribution board- is it necessary for all the outputs in distribution boards to be combined automatic switches with differential protection, or can the automatic switches be used, while the independent differential protection would protect the consumers in bathrooms?	It is necessary to submit the bid completely in accordance with the description of the position.
4.	In recapitulation – Energetic installations for objects 2a, 2b, 2c, 2d under the mark 05.02.4.1.02.00 there is: Overall vertical cable distribution, which in the bill of quantities is not mentioned as area which is to be done but it has the part “Collective consumption installations” which is not mentioned in the recapitulation. Can we correct the recapitulation for the mentioned positions?	This is a technical error. Recapitulation of electrical installations is correct only for OBJECT 2D, so please make corrections and recapitulation for the other objects (OBJECT 2A entry A, OBJECT 2A entry B, OBJECT 2b, OBJECT 2C) according to this one, regarding the section 2. ELECTRICAL INSTALLATION OF THE ELEVATOR and section 3. INSTALLATION OF JOINT CONSUMPTION.

		In enclosure of this Clarification there is corrected recapitulation of electrical installations
